* Indicated credits are only for core programme excluding the project. See the appendix for details on the M.Tech project. In addition, a minimum of 45 credits of electives have to be credited. Out of the 45 elective credits, at least 27 elective credits are to be taken from the EE2 list of electives listed below. The rest 18 elective credits can be any course offered in the institute at the 5000 level or higher.

** The semester-wise breakup of the electives is just for a preliminary guidance. The students are advised to take the help of the faculty advisor to decide on the number of electives to be taken in each of the three semesters.

$ One of the project guides should be from the Department of Electrical Engineering.

Appendix - MTech project (common for all EE streams)

M.Tech project can be done under these three options to enable a student to pursue summer internship. The project won't be allowed to extend to the summer after the 4th semester. At the end of the 3rd semester, the student should submit a report and make a presentation. The evaluation committee will then recommend whether or not the student is eligible to continue the project in the 4th semester. If the student is not found eligible, additional course work has to be done so as to meet the total credit requirements for obtaining the M.Tech degree.

	Credits completed at the end of the 4th year	Summer	Sem 3	Sem 4
